# 1 Overview

**Producer name:** JLLC «Dimsania»  
 Joint Limited Liability Company «Dimsania»

**Producer location:** 222020, Republic of Belarus, Minsk region, Krupsky district,  
 Krupsky settlement, Pobedy street, 1

**Geographic position:** 54°17'49.4"N 29°04'20.7"E

**Primary contact:** Piskunovich Yury, Director, SBP responsible  
[dimsania1@gmail.com](mailto:dimsania1@gmail.com) , тел. +375 29 6762198

**Company website:** <https://www.facebook.com/dimsania/>

**Date report finalised:** 02/Mar/2020

**Close of last CB audit:** 01/Apr/2020

**Name of CB:** NEPCon

**Translations from English:** Yes

**SBP Standard(s) used:** SBP Standard 2: Verification of SBP-compliant Feedstock  
 SBP Standard 4: Chain of Custody  
 SBP Standard 5: Collection and Communication of Data

**Standard(s) used:** <https://sbp-cert.org/documents/standards-documents/standards>

**SBP Endorsed Regional Risk Assessment:** Not Applicable

**Weblink to SBE on Company website:** Not Applicable

## 2 Description of the Supply Base

### 2.1 General description

The supply base is the whole territory of the Republic of Belarus.

All forests in Belarus are in exclusive property of the State. The total area of forest fund is 9.582 million ha of which 8.26 million ha are covered by forest lands. The percentage of forest cover in Belarus reached 39,8%. The total stock of timber is 1796 million m<sup>3</sup>, including ripe and overripe stands which comprise over 296 million m<sup>3</sup>.

As a result of conscious efforts on forests' reproduction, during the last 60 years the area covered by forest has doubled and reached its highest value for more than 100-year period. This increase is a result of both natural processes and afforestation of barren lands unsuitable for farming industry. In Belarus along with increase of total area of forest lands, one could witness a sustainable growth of ripening, ripe and overripe stands. The share of ripe and overripe forests is 14,7%. Average age of stands is over 56 years.

In Belarus the main principles of forest managements are based on the following regulatory documents:

- State-run program for 2016-2020 "Belarus forest"
- National strategy on sustainable development of the Republic of Belarus
- Forest Code of the Republic of Belarus.

28 tree species and about 70 species of bushes grow in Belarus. The most widespread are: Scots pine - 50.3%, Birch - 23.2%, European spruce - 9.2%, Black alder - 8.5%, Oak - 3.4%, Aspen - 2.1%

Depending on the functions performed, the lands of the forest fund are divided into 4 categories: operational, protective, environmental, recreation and health. In accordance with the legislation of the Republic of Belarus all forest lands are in state property and assigned to state forestry enterprises for use. The forest use in Belarus is based on the principle of continuity and sustainability.

Average annual timber harvesting value is about 18 million m<sup>3</sup>, which include:

- final felling (mature timber) – 40%
- cleaning cuttings and sanitary felling (young, middle-aged and ripening stands – 48%
- other cuttings – 12%.

The main conditions of forests' exploitation are the procurement of forest reproduction and protective afforestation. In 2018 the forest reproduction and afforestation were carried out at the total area of 41,82 thousand ha, including such measures as planting of new forests (about 34,8 thousand ha).

According to the forest legislation of the Republic of Belarus, the endangered species and the places of their habitation included in the Red List are to be protected during timber harvesting processes. The cutting of valuable, endangered and specially protected tree species is strictly prohibited.

There are two preserved areas at the territory of Republic of Belarus - Berezinsky Biosphere Reserve (85.2 thousand ha) and Polesie State Radioecological Reserve (216,1 thousand ha) and four national parks - Belovezhskaya Pushcha (152,962 thousand ha), Braslav Lakes (69,115 thousand ha), Narachanski National Park (93,3 thousand ha) and Pripyatsky National Park (85,841 thousand ha) as well as 334 forest Republic and local reserves and 874 monuments of nature.

The forest certification is an effective tool against illegal cuttings and illegal circulation of timber.

There two schemes of forest certification implemented in the Republic of Belarus: FSC (Forest Stewardship Council) and PEFC (Programme for the Endorsement of Forest Certification).

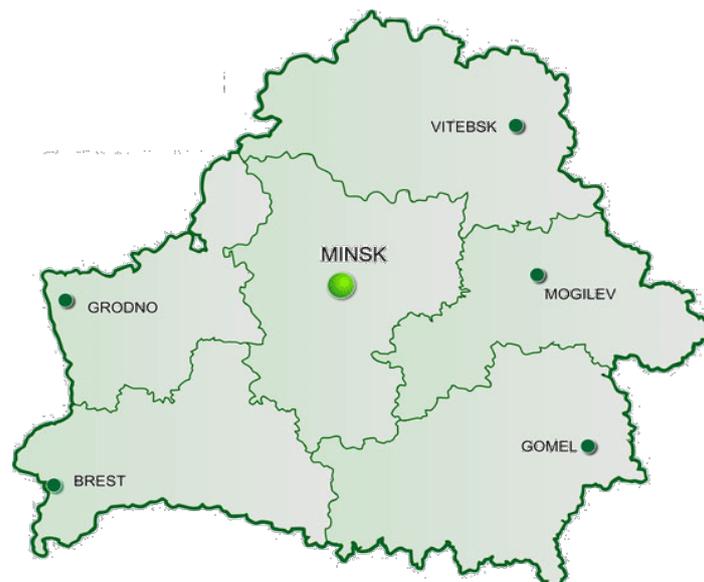

As of 1st of January 2019, 96 forest management units (98,5% of total forest fund that belongs to the Ministry of Forestry) is certified in accordance with the requirements of Forest Stewardship Council (FSC). 93 forest management units (95 % of total forest fund that belongs to the Ministry of Forestry) is certified in accordance with the requirements of PEFC (Programme for the Endorsement of Forest Certification).

In Belarus timber industry comprises of forest management (13,5%), processing of timber (69,5%) and paper-pulp industry 16,4%). Timber processing is one of the largest manufacturing sectors in Belarus Republic and has a share of about 2% from the whole processing sector in Belarus Republic. Timber industry in Belarus makes approximately 1,1% of gross domestic market. Timber-based products are exported to about 30 world countries.

## 2.2 “Dimsania” JLLC

JLLC «Dimsania» is a woodworking enterprise located in the Republic of Belarus. The main activity of JLLC «Dimsania» is the production of wood pellets. For the production of pellets, the company only uses sawdust procured from FSC-certified suppliers (sawmills) and Forest management units (leshozes) in the Republic of Belarus. The feedstock delivery to the production location is carried out with the company’s own transport.

Pic.1. Supply base of JLLC «Dimsania» - Republic of Belarus

The main feedstock sourcing regions within the reporting period:

- Minsk region
- Mogilev region

The following tree species are used in the production of wood pellets (about 20% - hardwood species, 80% - softwood species):

- White Birch (*Betula pendula*);
- Spruce (*Picea abies*);
- Alder (*Alnus* spp);
- Common aspen (*Populus tremula*);
- Pine (*Pinus sylvestris*).

No CITES/IUCN species are identified within the supply base of JLLC «Dimsania».

Feedstock data in the reporting period:

<i>Type of feedstock used</i>	<i>% in the reporting period</i>	<i>Number of suppliers</i>
<i>SBP-compliant Primary Feedstock</i>	0 %	-
<i>SBP-compliant Secondary Feedstock</i>	36 %	9
<i>SBP-compliant Tertiary Feedstock</i>	0 %	-
<i>Controlled Feedstock</i>	0 %	-
<i>SBP non-compliant Feedstock</i>	64 %	15

Since August 2019 JLLC «Dimsania» has only been procuring feedstock from FSC-certified suppliers with an FSC 100% claim.

## 2.3 Actions to promote certification among feedstock suppliers

In August 2019 company management made a decision to use only FSC-certified feedstock for the production of pellets. When communicating with potential feedstock suppliers JLLC «Dimsania» underlines the importance of voluntary forest certification.

Categories of raw materials that will be further used for the production of SBP pellets:

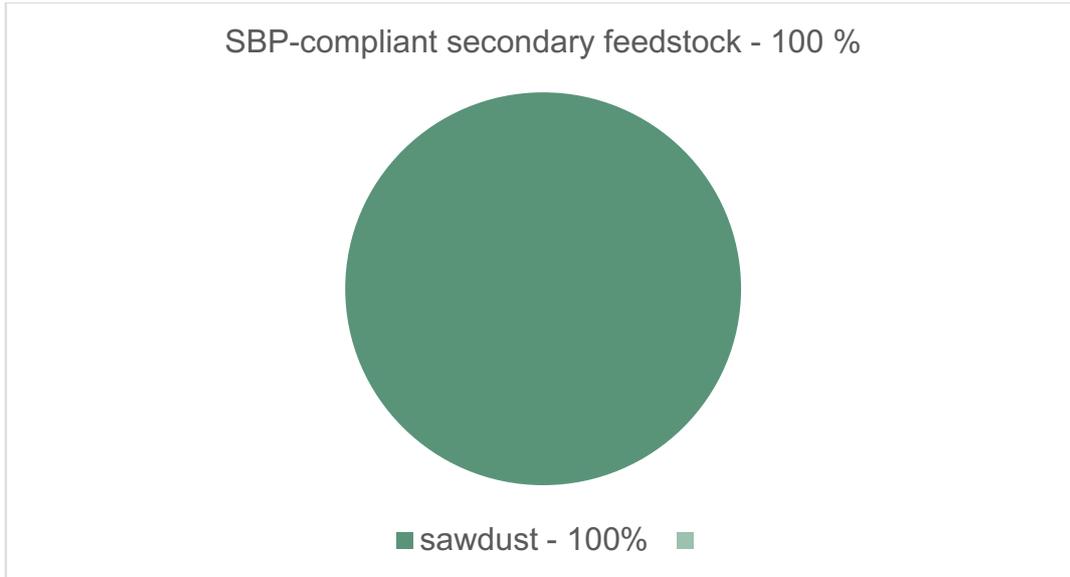

<i>SBP-compliant Secondary Feedstock</i>	100 %
--	-------

## 2.4 Final harvest sampling programme

Not applicable.

## 2.5 Flow diagram of feedstock inputs showing feedstock type [optional]

Only secondary feedstock (sawdust – 100%) with FSC 100% claim is used for the production of SBP pellets.

## 2.6 Quantification of the Supply Base

### Supply Base

- a. Total Supply Base area (ha): 9,582 ml.
- b. Tenure by type (ha): 9,582 ml. (100% stated owned)
- c. Forest by type (ha): 9,582 ml
- d. Forest by management type (ha): managed natural
- e. Certified forest by scheme (ha): 9,027 ml.– certified by FSC  
8,8 ml. – certified by PEFC

### Feedstock

- f. Total volume of Feedstock: 10 246,01 m3
- g. Volume of primary feedstock: not used
- h. List percentage of primary feedstock (g), by the following categories.  
Subdivide by SBP-approved Forest Management Schemes:
  - Certified to an SBP-approved Forest Management Scheme
  - Not certified to an SBP-approved Forest Management Scheme

- i. List all species in primary feedstock, including scientific name
- j. Volume of primary feedstock from primary forest
- k. List percentage of primary feedstock from primary forest (j), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
  - Primary feedstock from primary forest certified to an SBP-approved Forest Management Scheme
  - Primary feedstock from primary forest not certified to an SBP-approved Forest Management Scheme
  
- l. Volume of secondary feedstock: 10 246,01 m3
  
- m. Volume of tertiary feedstock: not used

### 3 Requirement for a Supply Base Evaluation

SBE completed	SBE not completed
<input type="checkbox"/>	X

Supply Base evaluation is not required, since the company uses only FSC-certified feedstock for the production of pellets.

## 4 Supply Base Evaluation

### 4.1 Scope

Not applicable.

### 4.2 Justification

Not applicable

### 4.3 Results of Risk Assessment

Not applicable.

### 4.4 Results of Supplier Verification Programme

Not applicable

### 4.5 Conclusion

Not applicable

## 5 Supply Base Evaluation Process

Not applicable.

## 6 Stakeholder Consultation

Not applicable.

### 6.1 Response to stakeholder comments

Not applicable.

## 7 Overview of Initial Assessment of Risk

Not applicable

## 8 Supplier Verification Programme

### 8.1 Description of the Supplier Verification Programme

Not applicable

### 8.2 Site visits

Not applicable

### 8.3 Conclusions from the Supplier Verification Programme

Not applicable.

## 9 Mitigation Measures

### 9.1 Mitigation measures

Not Applicable

### 9.2 Monitoring and outcomes

Not applicable

## 10 Detailed Findings for Indicators

Not applicable.

## 11 Review of Report

### 11.1 Peer review

No expert evaluation was carried out.

### 11.2 Public or additional reviews

Supply Base Report in the Russian language has been published on the company website and can be sent to any party concerned at the request.

Any comments can be sent to the following e-mail address [dimsania1@gmail.com](mailto:dimsania1@gmail.com).

No additional assessment was carried out.

## 12 Approval of Report

Approval of Supply Base Report by senior management			
Report Prepared by:	<i>Piskunovich Yury</i>	<i>Director</i>	<i>02.03.2020</i>
	Name	Title	Date
The undersigned persons confirm that I/we are members of the organisation’s senior management and do hereby affirm that the contents of this evaluation report were duly acknowledged by senior management as being accurate prior to approval and finalisation of the report.

## 13 Updates

### 13.1 Significant changes in the Supply Base

Not applicable, as this report has been prepared for the primary (main) evaluation.

### 13.2 Effectiveness of previous mitigation measures

Not applicable.

### 13.3 New risk ratings and mitigation measures

Not applicable.

### 13.4 Actual figures for feedstock over the previous 12 months

#### Supply Base

- n. Total Supply Base area (ha): 9,582 ml.
- o. Tenure by type (ha): 9,582 ml. (100% stated owned)
- p. Forest by type (ha): 9,582 ml
- q. Forest by management type (ha): managed natural
- r. Certified forest by scheme (ha): 9,027 ml.– certified by FSC  
8,8 ml. – certified by PEFC

#### Feedstock

- s. Total volume of Feedstock: 10 246,01 m3
- t. Volume of primary feedstock: not used
- u. List percentage of primary feedstock (g), by the following categories.  
Subdivide by SBP-approved Forest Management Schemes:
  - Certified to an SBP-approved Forest Management Scheme
  - Not certified to an SBP-approved Forest Management Scheme
- v. List all species in primary feedstock, including scientific name
- w. Volume of primary feedstock from primary forest
- x. List percentage of primary feedstock from primary forest (j), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
  - Primary feedstock from primary forest certified to an SBP-approved Forest Management Scheme
  - Primary feedstock from primary forest not certified to an SBP-approved Forest Management Scheme
- y. Volume of secondary feedstock: 10 246,01 m3
- z. Volume of tertiary feedstock: not used

## 13.5 Projected figures for feedstock over the next 12 months

Projected feedstock volume 2020: 10 000 m3.
